AI CAREER MENTOR APP

Section 10

Project Overview

AI Career Mentor is a mobile application that helps students and young professionals identify suitable career paths based on their interests, skills, personality, and goals. The app provides AI-powered career recommendations, personalized learning roadmaps, internship suggestions, resume guidance, and an AI chatbot for career support.

Section 11

Problem Statement

Many students struggle to choose the right career because they lack personalized guidance and awareness of available opportunities. Existing career guidance platforms often provide generic recommendations and have complex interfaces. There is a need for an AI-powered solution that offers personalized career guidance, skill development, and career planning in one platform.

2. Have you ever used a career guidance application?
3. Which career guidance platform do you currently use?
4. What difficulties do you face while choosing a career?
5. Do you know which skills are required for your dream job?
6. Would you prefer AI-generated career recommendations?
7. Do you need a personalized learning roadmap?
8. Have you completed any career assessment tests?
9. Would you like an AI chatbot for career guidance?
10. What feature would help you most in career planning?
11. How often do you search for internships?
12. Do you track your learning progress?

Section 4

PERSONA

Anjali is a third-year Computer Science student who is unsure about her future career path. She wants a platform that helps her discover careers that match her interests, identify the skills she needs, receive AI-powered career guidance, and prepare for internships and placements.

Goals
- **Discover the right career path.**
- **Understand her strengths and interests.**
- **Learn industry-relevant skills.**
- **Prepare for internships and placements.**
- **Build a strong resume and portfolio.**
- **Track her learning progress.**

Frustrations
- **Confused about career options.**
- **Doesn't know which skills to learn first.**
- **Receives generic career advice.**
- **Difficulty finding reliable career guidance.**
- **Unsure about internship requirements.**
- **Overwhelmed by too many online resources.**

Motivation
- **Secure a good internship.**
- **Get placed in a reputed company.**
- **Improve technical and soft skills.**
- **Build confidence for interviews.**
- **Achieve long-term career success.**
- **Continuous learning and self-growth.**

Platforms Used
- **LinkedIn**
- **Coursera**
- **Udemy**
- **GitHub**
- **ChatGPT**
- **College Placement Portal**

Section 5

SAYS
- **"I'm confused about my future."**
- **"I don't know which career suits me."**
- **"I need personalized guidance."**

THINKS
- **"Am I learning the right skills?"**
- **"Will I get a good job?"**
- **"Which career has better opportunities?"**

DOES
- **Searches careers on Google.**
- **Watches YouTube career videos.**
- **Uses LinkedIn and Coursera.**
- **Asks seniors for advice.**

FEELS
- **Confused**
- **Anxious**
- **Curious**
- **Motivated to improve**
